**Model # is located by barcode.**  
Please write your model # on your sales receipt or below.  
**Le numéro de modèle se trouve à côté du code-barres.**  
Veuillez inscrire le numéro de modèle sur votre reçu de vente ou ci-dessous.  
**El número de modelo está ubicado al lado del código de barras.**  
Sirvase escribir el número de modelo en el recibo de compra o debajo.

Model Number: \_\_\_\_\_

www.waterpik.com/shower-register

FN 20030827-F AB

## INSTALLATION

1 Tighten pivot ball to pipe by turning in a clockwise direction as shown. Ensure large nut is secure by hand tightening.

2 Connect either end of the hose to the bottom of the bracket by turning clockwise. Hand tighten. (See note below).

3 Connect other end of hose to hand held shower head and hand tighten by turning clockwise.

4 Place hand held shower head in bracket.

### Vacuum Breaker Backflow Prevention

**Note:** Several U.S. state and local municipal plumbing codes require the use of a backflow prevention device when installing a hand shower. This device is termed a vacuum breaker. If your hand shower includes a vacuum breaker it will be located in the hose, and the hose end with the vacuum breaker will include a sticker that reads "attach this vacuum breaker end to shower bracket." If the hose is not installed in this manner, water will not flow. If your hand shower does not include a vacuum breaker, and you would like to obtain one free of charge, please contact us at **1-800-525-2774** (U.S. calls only) and request part number 20009558.

## OPERATION

**Spray Selector:**  
Spray Selector allows you to select from various spray patterns. Spray pattern is controlled by the small lever (Mode Tab) that rotates left and right. Rotate the face of the shower head to change patterns.

## SPECIAL FEATURES

### Using the Cleaning Spray:

- Point the top of the shower head toward the drain with the shower facing down (see drawing below).
- Push the MODE TAB to the left-most 6 o'clock position to activate the cleaning spray. (You will be rotating the face counter-clockwise as you view the back of the handle).

**Will not activate in this position**      **Will activate in this position**

**IMPORTANT.** The cleaning spray will only activate when the top of the shower head is below the horizontal position. A safety mechanism inside keeps the mode from being activated when it is above horizontal position.

- If you are holding the shower head below horizontal position but cleaning spray will not activate, move the mode tab/spray selector out of cleaning spray mode, and then back into cleaning spray mode while continuing to point the shower head down.

**Make sure you move out of cleaning mode (out of the 6 o'clock position) before putting the showerhead back into the bracket and turning off the water. If you do not, you risk spraying your ceiling when you turn your water back on.**

### WARNINGS:

- Cleaning Spray mode is extremely powerful. Avoid pointing directly at face or other sensitive areas when using cleaning mode.
- If using the cleaning mode outside of the shower/tub, switching to a mode other than cleaning mode can cause shower to spray the floor.
- To avoid hot water dangers and conserve even more energy, make sure your water heater is set at 120°F (48.9°C) or below.
- Test the tub/shower water with your hand before bathing.
- For additional safety for Ecoflow® or high efficiency shower heads, it is recommended that all homes have installed a pressure balance tub and shower valve with the rotational limit stops properly set by a plumber. If you are unsure of your valve type consult your plumber.
- For external use only.** The potentially deadly amoeba, *Naegleria fowleri*, may be present in some tap water or unchlorinated well water.
- Always ensure the hand held shower head is properly placed in the bracket, so as to prevent the shower head from falling.
- Do not pull on or tug the flexible hose. This may result in the shower head coming loose and falling.

## CARE AND CLEANING

- To maintain proper working conditions cleaning is required when mineral deposits appear on the spray orifices. To clean mineral deposits, gently rub the rubber nozzles on the face of the shower head with fingers to dislodge.
- To clean heavier deposits, remove shower head and soak face down in 1-2 cups of white vinegar (use white vinegar only) for about 2-3 hours. Replace shower head and run in each mode to flush out vinegar. Repeat as necessary.
- Do not clean or rinse any part with harsh chemicals, heavy duty cleaners, or abrasives; this may damage parts or finish and will void warranty.**
- Clean filter screen by unscrewing from the pivot ball and rinse by back flushing to remove particles. Follow steps 1-3 under installation to reinstall shower head, making sure washer is re-seated on top of filter screen.

## TROUBLESHOOTING GUIDE

Problem	Solution
No water flow from installed shower head.	a Check that the shower is not in cleaning mode while pointed vertically. b Confirm previous shower washer is not in the shower pipe. c Confirm there is only one washer in the pivot ball.
Low water pressure or missing spray patterns.	a Clean shower head in vinegar/water solution. (See care & cleaning section). b Clean filter screen.
Leaking at pipe/pivot ball connection.	a Confirm only one washer is seated on top of the filter screen. b Make sure all pipe tape is removed from shower pipe. Please refer back to prior to installation instructions for pipe tape. c Grate bar of soap across the shower pipe threads to act as a sealant.
Bracket is too stiff to change angle.	a Install hand held in bracket (as shown in Step 4) to provide additional leverage to change angle of spray (contact Water Pik for further instructions).
Leaking at hose connection to shower head or shower head bracket.	a. Make sure rubber washer is in place inside hose connector.

## LIFETIME LIMITED WARRANTY

**Save your receipt as proof of purchase is required for warranty action.** Water Pik, Inc. warrants to the original purchaser of this product that it is free from defects in material and workmanship for as long as the original purchaser owns this product. Water Pik, Inc. will replace

the product, which in our opinion is defective, provided that the product has not been abused, misused, altered or damaged after purchase. This includes damage due to use of tools or harsh chemicals. In the event an item has been discontinued, we will replace with what we deem to be the closest product. Water Pik, Inc. is not responsible for labor charges, installation, or other consequential cost. The responsibility of Water Pik, Inc. shall not exceed the original purchase price of the product. This warranty gives you specific legal rights. You may also have other rights that vary depending on where you reside.

Water Pik, Inc. disclaims all other express or implied warranties to the extent permitted by law including, but not limited to, all warranties of merchantability and fitness for a particular purpose. All implied warranties are limited to the duration of this limited warranty. Some states or provinces may not allow limitation on how long an implied warranty lasts, so above may not apply to you.

### FOR USA ONLY

**Limitation of Liability:** This limited warranty is your sole remedy against Water Pik, Inc. and it shall not be liable for any damages, whether direct, indirect, incidental, special, consequential, exemplary or otherwise, including but not limited to property damage, arising out of any theory of recovery, including statutory, contract or tort.

## BINDING ARBITRATION AND WAIVER OF RIGHT TO ASSERT MATTERS IN COURT AND RIGHT TO JURY TRIAL

By purchasing, installing, or using this product you agree that any controversy or claim arising out of or relating to your purchase, use, modification, installation, or removal of this product shall be settled by binding arbitration. The arbitrator's decision will be final and binding. Judgment on the award rendered by the arbitrator may be entered in any court having jurisdiction over the matter. Further, you agree that you will not have the right to litigate any claim arising out of or in relation to your purchase, use, modification, installation, or removal of this product in any court or to have a jury trial on that claim.

Arbitration of any matters shall be administered by the American Arbitration Association and conducted by one arbitrator in accordance with the consumer arbitration rules of the American Arbitration Association in effect at the time of filing of the demand. The venue for all such arbitrations shall be Colorado and any such arbitration shall be subject to the Federal Arbitration Act and Colorado law.

## WAIVER OF RIGHT TO PARTICIPATE IN CLASS ACTIONS OR PURSUE CLAIMS IN A REPRESENTATIVE CAPACITY.

Further, by purchasing, installing, or using this product you agree that arbitration must be on an individual basis. This means neither you, nor we, may join or consolidate claims in arbitration by or against other purchasers or users of Water Pik, Inc. products or the general public. Additionally, you may not litigate in court or arbitrate any claims as a

representative or member of a class or in a purported representative capacity on behalf of the general public, other purchasers or users of this product, other persons or entities similarly situated, or in a private attorney general capacity.

**If product malfunctions or becomes damaged, stop use immediately and contact Water Pik, Inc. for assistance.**

## Have any questions or need assistance?

For quick service prior to calling have your model number and receipt ready.

## FRANÇAIS

Nous vous remercions pour l'achat de cette douchette Waterpik®. Ce livret fournit des instructions pour une installation rapide et facile. Vous allez bientôt pouvoir profiter d'une douche énergisante et revitalisante grâce à votre nouvelle douchette Waterpik®.

D'autres informations sur les douchettes Waterpik® sont disponibles sur le site [www.waterpik.com](http://www.waterpik.com). Pour en savoir plus sur les bienfaits water for wellness® de Waterpik®, visitez le site Web [www.waterpikwellness.com](http://www.waterpikwellness.com).

**Note :** Les illustrations incluses peuvent ne pas représenter exactement le produit acheté (douchette).

## AVANT L'INSTALLATION

- Retirez l'ancienne douchette et enlevez l'adhésif à tuyauteries.
- Veillez à ce que le joint de la douchette existante ne reste pas attaché sur le tuyau de douche. Utilisez un ustensile mince tel un crayon ou un tournevis pour vérifier qu'aucun joint ne se trouve à l'intérieur du tuyau de douche. **Ne pas utiliser les doigts.**
- Regroupez les outils dont vous pourriez avoir besoin lors de l'installation de la nouvelle douchette.

## OUTILLAGE POUVANT ÊTRE NÉCESSAIRE

- Des outils peuvent être nécessaires pour ôter l'ancienne douchette ou serrer la nouvelle.

Clef à molette ou pince (non inclus)

Chiffon doux (non inclus)

L'utilisation d'adhésif à tuyauterie n'est pas recommandée.

## INSTALLATION

1 Serrer le raccord articulé sur le tuyau en tournant dans le sens horaire, tel qu'illustré. S'assurer que l'écrou est solidement fixé en le serrant à la main.

2 Raccorder n'importe laquelle des extrémités du tuyau à la partie inférieure du support en tournant dans le sens horaire. Serrer à la main. (Voir la remarque ci-dessous).

3 Raccorder l'autre extrémité du tuyau à la douchette à main et serrer à la main en tournant dans le sens horaire.

4 Placer la douchette à main dans le support.

## Prévention de reflux avec brise-vide

**Remarque :** Plusieurs codes de plomberie fédéraux et municipaux locaux des É.-U. requièrent l'installation d'un dispositif de prévention de reflux pour l'installation d'une douchette manuelle. Ce dispositif est connu sous le nom de brise-vide. Si la douchette manuelle comprend un brise-vide, celui-ci se situe dans le tuyau et l'extrémité du tuyau avec le brise-vide comporte un autocollant sur lequel est inscrit « raccorder cette extrémité du brise-vide au raccord de douche ». Si le tuyau n'est pas installé de cette manière, l'eau ne coulera pas. Si la douchette manuelle ne comprend pas de brise-vide et que vous souhaitez en obtenir un sans frais, veuillez nous contacter au **1-800-525-2774** (uniquement pour les appels provenant des É.-U.) et demandez la pièce n° 20009558.

## UTILISATION DU PRODUIT

### Sélecteur du mode d'aspersion :

Le sélecteur du mode d'aspersion vous permet de choisir parmi divers réglages d'aspersion. La sélection du mode d'aspersion est effectuée à l'aide d'un petit levier (langette de sélection des modes) qui tourne à gauche et à droite. Tourner la douchette pour modifier les réglages.

## CARACTÉRISTIQUES SPÉCIALES

### Utilisation du jet de nettoyage :

- Diriger le haut de la douchette vers la canalisation, la douchette étant orientée vers le bas (voir le dessin ci-dessous).
- Poussez la LANGUETTE DE SÉLECTION DES MODES sur la position à 6 heures la plus à gauche pour activer le jet de nettoyage. (Vous devez tourner dans le sens antihoraire lorsque le dos du manche vous fait face).

**Ne sera pas activé dans cette position**

**S'activera dans cette position**

**IMPORTANT :** Le jet de nettoyage ne s'active que lorsque le haut de la douchette est sous la position horizontale. Un mécanisme de sécurité interne empêche le mode d'être activé lorsque la douchette est au-dessus de la position horizontale.

- Si vous tenez la douchette sous la position horizontale, mais que le jet de nettoyage ne s'active pas, tournez la languette de sélection du mode (sélecteur de jet) hors du mode de jet de nettoyage, puis remplacez-la en mode de jet de nettoyage, tout en maintenant la douchette orientée vers le bas.

**Avant de remettre la douchette dans son support et de couper l'eau, veillez à quitter le mode de nettoyage (la position**

**à 6 heures). Si vous ne le faites pas, vous risquez d'asperger votre plafond lorsque vous ouvrirez à nouveau l'eau.**

### AVERTISSEMENTS :

- Le jet du mode de nettoyage est extrêmement puissant. Évitez de diriger la douchette directement vers le visage ou d'autres zones sensibles lorsque vous utilisez le mode de nettoyage.
- Si vous utilisez le mode de nettoyage à l'extérieur de la douche ou de la baignoire, le passage à un mode autre que le mode de nettoyage peut occasionner une aspersion sur le sol.
- Afin de conserver encore davantage d'énergie et d'éviter les dangers liés à une eau trop chaude, s'assurer que votre chauffe-eau soit réglé à une température maximale de 120°F (48,9°C).
- Tester la température de l'eau de la baignoire/douche avec la main avant de se baigner.
- Pour plus de sécurité, l'installation (dans n'importe quel domicile) d'un mitigeur à équilibrage des pressions (pour baignoire/douche) avec butées de limitation de rotation adéquatement réglées par un plombier est recommandée pour les douchettes Ecoflow® ou les douchettes à haute efficacité. Si vous avez un doute sur votre type de mitigeur, consultez votre plombier.
