

IN EVERY THERABREATH™ ORAL RINSE

SCIENCE, HONESTY & PURPOSE

Odour-causing bacteria can persist in the mouths of even the most dedicated brushers and flossers. For patients struggling with stubborn bad breath, TheraBreath™ offers patients a non-burning, alcohol-free way to fight back!

- ✓ Dentist formulated
- ✓ Clinically shown to fight bad breath for 12 hours*
- ✓ Oxygenates with the power of sodium chlorite
- ✓ Free of alcohol, sulphates, and dyes
- ✓ pH neutral to slightly alkaline (pH = 8.2)

Our stabilized sodium chlorite helps fight the anaerobic bacteria that produce malodorous volatile sulphuric compounds.

Experience the TheraBreath™ difference

When dentist and bacteriologist Harold Katz needed a better mouth rinse for his daughter's chronic bad breath, he created TheraBreath™ Fresh Breath oral rinses. Thirty years later, our line has grown, and we now have effective and great-tasting solutions for the most common conditions you see in your office.

Recommend TheraBreath™.
Our purpose is to help your patients improve their oral health.

HAROLD KATZ,
dentist and bacteriologist
